

VR-60 CLASSIC

To take a classic pickup and change it is a risky endeavor, however we have unlocked the secret. Starting with an even tonal foundation, whatever effects you add, this pickup will retain the clarity that is missed in stock pickups.

The VR-60 Classic pickup is carefully made with American made plain enamel copper wire and bar type Alnico 5 magnets. Encased with a nickel silver or gold plated frame and cover, cloth covered leads and braided shield. The coils are wax potted for stabilization to insure the complete, clean reproduction of sound.

Equipped with 2 or 4 wire leads that give the player endless tonal possibilities.

Position	D.C.Resistance	Resonant Peak	Spacing	Output Level	Tone Chart:
NECK:	7.5 kohm	7.5 kHz	50 mm	MID	
BRIDGE:	8.0 kohm	7.2 kHz	50 mm	MID-HIGH
